

POWER-XTRA

Model : Power-Xtra Li-ion/Li-Po PCM 48.1V (13 Cell) 35 A_PCX-17C-L13S35ATJ-MM00 Ver: REV01 NO: 900.600.501.167

1. Product Summary:

Adopt foreign premium IC in class A protection.

Use professional high current trace design and process to withstand large current surge.

Complete overcharge, over discharge, over current, short circuit function.

2. Electrical Parameters:

	Description	Specification	Unit	Remarks
Discharge	Continue discharge current	35	A	
	Sparkle current	100	A	
Charge	Charge voltage	54.6	V	
	Charge current	35 (MAX)	A	
Over charge protection	Over charge detect voltage	4.25±0.05	V	
	over charge protection delay	0.5	S	
	over charge release voltage	4.19±0.05	V	
Balance	Balance detect Voltage	4.18	V	
	Balance release voltage	4.18	V	
	Balance current	35±5	mA	
Over discharge protection	Over discharge detect voltage	2.8±0.1	V	
	Over discharge detect delay	20	mS	
	Over discharge release voltage	2.8±0.1	V	
Over current protection	Over current detect voltage	/		
	Over current detect delay	100	MS	
	Over current protection current	100±20	A	as required
	Over current protection release	Off load		
Short Circuit protection	Short Circuit protection condition	Short circuit of external load ofext		
	Short circuit detect delay	250	uS	
	Short circuit protection release condition	Off load		
Temp Protect	Protection temperature	70	°C	No
Inner Resistance	Main Circuit Conduct Inner	≤20	mΩ	
Self Consumption	Working current	≤100	uA	
	Sleeping current(when in	≤20	uA	
Working Temp	Temp range	-20/+70	°C	

POWER-XTRA

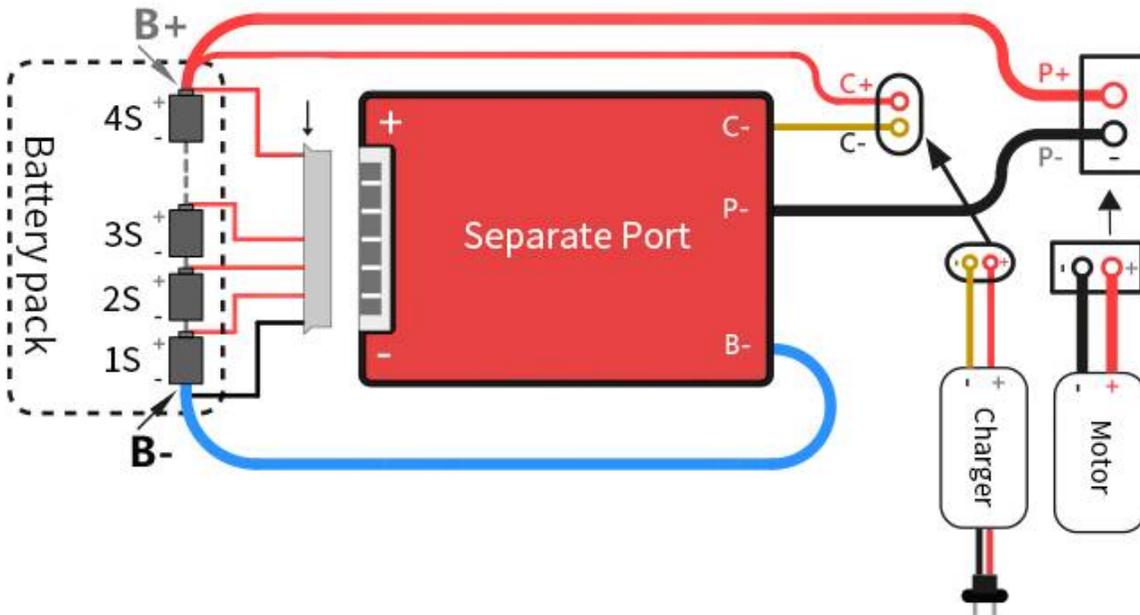

Model : Power-Xtra Li-ion/Li-Po PCM 48.1V (13 Cell) 35 A_PCX-17C-L13S35ATJ-MM00 Ver: REV01 NO: 900.600.501.167

3. BMS wiring

(1). Product picture

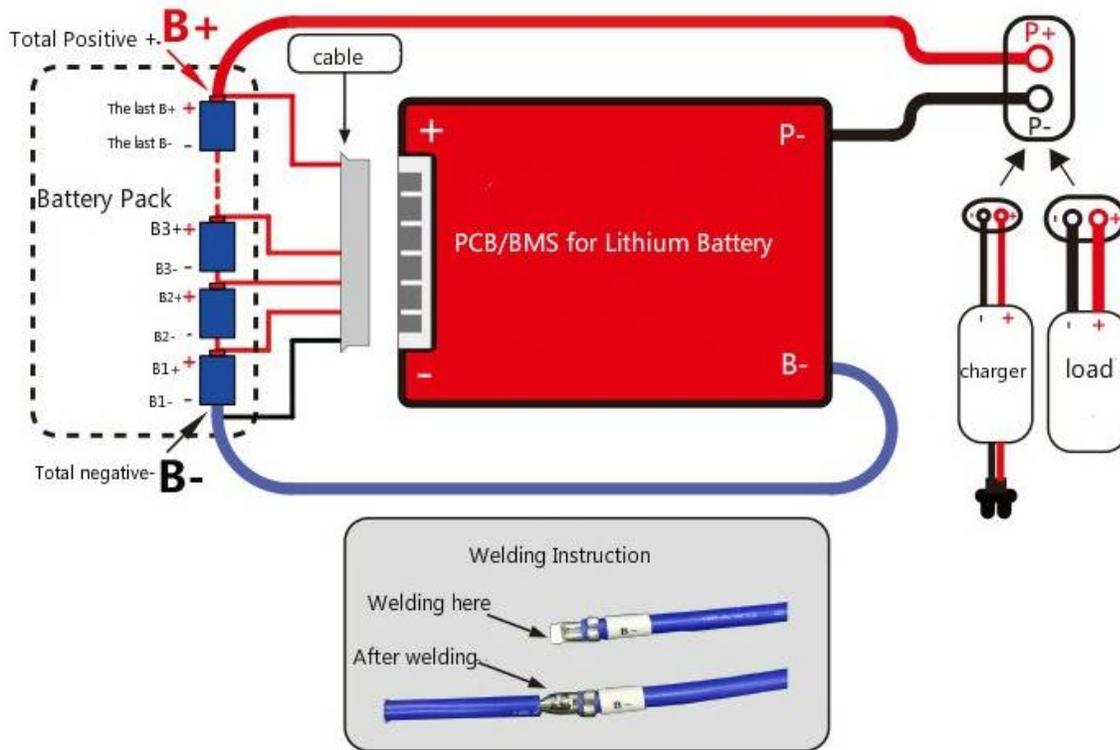

(2). Wiring diagram

POWER-XTRA

Model : Power-Xtra Li-ion/Li-Po PCM 48.1V (13 Cell) 35 A_PCX-17C-L13S35ATJ-MM00 Ver: REV01 NO: 900.600.501.167

(3).Wiring operation

- (1) First connect the B-line of the protection board to the total negative pole of the battery pack;
- (2) The cable starts from the thin black line connecting B-, the second line connects the positive pole of the first string of batteries, and the next string is connected in turn.
The positive pole of the pool; then insert the cable into the protection board;
- (3) After the wiring is completed, measure whether the battery B+, B-voltage and P+, P-voltage values are the same, the same, that is, the protection board works positively. otherwise please follow the above re-operation; 0 0
- (4) When removing the protection board, first pull out the cable (if there are two cables, pull the high-voltage cable first, then pull the low-voltage cable), then remove Power line B-.

4. Warranty

All our produced Lithium battery BMS, we guarantee 3 years warranty in quality, if the damage is caused by human improper operation, we will conduct repair with charge

5. Attention Items

1. Lithium battery BMS with different voltage platform cannot be used mutually, e.g., Life Po4 BMS cannot be used for Li-ion battery.
2. In utilization, please to make sure to Follow up the designed parameter and utilization conditions.
3. Charge and discharge current cannot be higher than the quoted current value in specification.
4. Please to utilize the BMS in the the regulated working temperature range, and make sure of the well heat dissipation environment.
5. No self-taking off and change parts in BMS.
6. Our product has the function of waterproof, but still suggest avoid of long time water immersion.
7. We conduct Anode Oxidation process in BMS dissipation plate, but when the Oxidation layer delatoid, it still may electricity conductive, it is still suggest to avoid Dissipation plate contact with Cell and Nickel band.
8. If the protection board is abnormal, please stop using it, and then solve the problem and use it again;
9. Do not use two protective plates in series or in parallel.

NOTE:

Our products undergo strict factory inspection tests, but because the environment used by customers is different (especially at high temperatures, Ultra-low temperature, under the sun, etc.), it is inevitable that there will be a protection board failure, so customers need to be friends when choosing and using the protection board. Use in a good environment, and choose a certain amount of protection board.
